Working Prototype Known Problems Report

Team Speakeasy

3/9/22

List of uncompleted functionality

1. Login page: We don't have any UI features to show a failure to create a new account or log into an existing account.
2. Writing a letter: We don't have any checks to verify the length of the letter. Users can send empty letters.
3. Frontend/backend integration: We haven't integrated our load balancer with our frontend. This integration has not undergone any unit testing.
4. Content tags: We did not get time to do the content tagging functionality.
5. Toxicity report: We did not get time to implement reporting system for toxic letters.
