## Sprint #1 Review

Team Speakeasy

2/9 - 2/23

### Effective Practices

The team agrees that additional meetings outside of scrum meetings for live coding and code review lead to immediate benefits in integration tasks between the frontend and backend.

Additionally, the current method of shorter scrum meetings with an emphasis on scheduling separate meetings to solve blocking issues works better than trying to solve them during the scrum.

### Ineffective Practices

The team still feels that there are decent sections of time within the sprint where many members are idling, either due to problems in the sprint planning portion or lack of clear communication on what tasks are priorities.

### Needed Practices

The team should fully flesh out code review, specifically how pull/merge requests get handled, as a decent portion of integration is backlogged by a lack of code review.

### Finished/Unfinished Work

Finished:

US 3: As a user, I want the ability to register for an account.

US 4: As a user, I want the ability to log in to my account/stay logged in to my account.

US 5: As a user, I want the ability to log out of my account.

Unfinished:

US 4: As a user, I want to send letters to other users

US 5: As a user, I want to receive letters and respond to letters sent to me

US 6: As a user, I want to review letters I sent and see responses to them

Work Completion Rate: Finished 26 out of the 42 hours in tasks (32%).

[Burnup Chart](#)

Hours per day: The team logged ~1.1 hours per day. Disregarding days where no progress was made, the team logged ~4 hours per day.
