

Sprint 1 (1/12-1/25)

		Subitems	Type	Item owner	Priority	Dev status	Estimated Effort ⓘ	Finish Date
	SP1-1: Access landing page	 	Story Point			Finished		
	SP1-2: Functioning webserver	 	Story Point			Finished		
	SP1-1: Set up initial React project	 	Frontend			Finished	1 Hours	
	SP1-2: Set up initial backend webserver	 	Backend			Finished	1 Hours	
	SP1-2: Set up initial backend databases	 	Database			Finished	1 Hours	
							3 Hours sum	<div>-</div>

Sprint 2 (1/26-2/8)

		Subitems	Type	Item owner	Priority	Dev status	Estimated Effort ⓘ	Finish Date
	SP1-3: User Registration	 	Story Point		High	Finished		
	SP1-4 User Login	 	Story Point		High	Finished		
	SP1-5: User logout	 	Story Point		High	Finished		
	SP1-3: modify existing webserver to receive user registration data and pr...	 	Backend			Finished	4 Hours	
	SP1-3: build user registration react component	 	Frontend			Finished	2 Hours	
	SP1-3: set up database to hold user account information	 	Database			Finished	2 Hours	
	SP1-4: Build user login/logout react components	 	Frontend			Finished	2 Hours	
	SP1-4: modify existing webserver to validate user login	 	Backend			Finished	3 Hours	
	SP1-4: set up db queries for user account login info	 	Database			Finished	1 Hours	
	SP1-5: build view for when user logs in	 	Frontend			Finished	3 Hours	
	SP1-5: build initial react components to handle user log out	 	Frontend			Finished	2 Hours	
	SP 2-1 Setting up "send a message" view	 	Frontend		High	Finished	3 Hours	
	SP 2-1 Set up schema for global inbox	 	Database	 	High	Finished	4 Hours	
							26 Hours sum	<div>-</div>

Sprint 3 (2/9-2/22)

		Subitems	Type	Item owner	Priority	Dev status	Estimated Effort ⓘ	Finish Date
	SP 2-1 Sending letters	 	Story Point		Medium	Finished		
	SP 2-2 Responding to letters	 	Story Point		Medium	Finished		
	SP 2-3 Managing user inbox	 	Story Point		Low	Finished		

	SP 2-1 Making the webserver utilize db+ frontend view			Backend		Medium	Finished	4 Hours	
	SP 1-(3/5) Writing integration tests for login/reg system			Testing		Medium	Finished	3 Hours	
	SP 2-2 "request/respond to a Letter" view		 2	Frontend		High	Finished	3 Hours	
	SP 2-2 Make the webserver query the global inbox for letters			Backend		Medium	Finished	2 Hours	
	SP 2-3 "View Past Letters" view			Frontend		High	Finished	3 Hours	
	SP 2-3 make the webserver query the local inbox for past letters			Backend		Medium	Finished	2 Hours	
	SP 2-(1/2) Testing Letter+Response System			Testing	 	Low	Finished	3 Hours	
								20 Hours <small>sum</small>	<div>-</div>

Sprint 4 (2/23-3/8)

Sprint 4 (2/23-3/8)

		Subitems	Type	Item owner	Priority	Dev status	Estimated Effort ⓘ	Finish Date	
	Finish/build on Minimum Viable Product			Story Point		High	In progress		
	Testing database queries			Database		Medium	Finished	2 Hours	Mar 4
	Building on current User Interface for better presentability			Frontend		Medium	Finished	3 Hours	Mar 1
	Load balancers for scalability			Backend		Medium	Finished	2 Hours	Mar 7
	Come up with finalized design			UI design		Medium	Finished	2 Hours	Mar 3
	Use React to come up with User Interface			Frontend			Finished	4 Hours	Mar 5
	Write system tests and document			Testing			In progress	1 Hours	
								14 Hours sum	Mar 1 - 7
