Safehouse

Sprint Plan #3

High-level goal: Send letters, respond to letters, and manage user inbox

Tasks:
Backlog: T1 Modify registration form to include user email
T2 Use google oauth to authenticate user accounts

US1 - As a user, I want the ability to send letters to others
T1 - Make web server utilize database and front end view
T2 - Test letter and response system

US2 - As a user, I want the ability to respond to others' letters
T1 - Build a view for "requesting and responding to a letter"
T2 - Make web server query global inbox for letters
T3 - Test letter and response system

US3 - As a user, I want to be able to manage my inbox
T1 - Build a view for "viewing past letters"
T2 - Make web server query local inbox for past letters

US4 - As a user, I want to be able to register and create an account
T1 - Write integration tests for login/registration system

US5 - As a user, I want to be able to logout of my account
T1 - Write integration tests for login/registration system
